The heart muscle has three layers and they are as follows:. Epicardium. The epicardium or the visceral and outermost layer is actually a part of the heart wall.: Myocardium, The myocardium consists of thick bundles of cardiac muscle twisted and whirled into ringlike arrangements and it is the layer that actually contracts.

The first wave on an ECG is the P wave, indicating atrial depolarization in which Page 13/31

the atria contract ary (atrial systole). The P wave is the first wave on the ECG because the action potential for the heart is generated in the sinoatrial (SA) node, located on the atria which sends action potentials directly through Bachmann's bundle to depolarize the atrial muscle cells.

Heart Anatomy | Anatomy and Physiology Cardiac anatomy and physiology is complex.

A useful resource on this topic is available online (www.cvphysiolo gy.com). The second article in this series. covering cardiac pathophysiology, will show how using a methodical system can facilitate a more comprehensive understanding of what goes wrong in cardiac diseases.

The deep cardiac plexus is located on the bifurcation of the trachea, and the superficial cardiac plexus is located on the base of the heart below the arch of the aorta. The autonomic nervous system is made up of a twoneuron chain (using the presynaptic neuron and the postsynaptic neuron) from the

central nervous system to the heart.

The conduction d velocity through the His bundle, the bundle branches, and the Purkinje network is very rapid, assuring coordinated RV and LV depolarization and contraction. In contrast, exogenous cardiac pacing does not rely on the normal conduction sequence and may cause dyssynchronous LV activation, which may

be misinterpreted as a new ischemia-induced regional wall motion abnormality during cardiac surgery.

pumped by each nary ventricle in one d minute. To calculate this value, multiply stroke volume (SV), the amount of blood pumped by each ventricle, by heart rate (HR) in contractions per minute (or beats per minute, bpm). It can be represented mathematically by the following equation:
