The APA code of ethics is composed of key principles and ethical standards. The principles are intended as a guide to help inspire psychologists as they work in their profession, whether they are working in mental health, in research, or in business. The standards, on the other hand, are expectations of conduct that can lead to professional and legal ramifications when violated.

APA Ethics Code: Guidelines for Ethical Behavior

APA's Ethics Code mandates that psychologists who conduct research should inform participants about: The purpose of the research, expected duration and procedures. Participants' rights to decline to participate and to withdraw from the research once it has started, as well as the anticipated consequences of doing so.
