The benefits of GPS fleet tracking. GPS fleet tracking may have started out as a way of keeping drivers from getting lost, but the benefits for companies that have a fleet of vehicles on the road at any given time are many. For example:
Location alerts and reports

What is GPS fleet tracking?

Fleet tracking is a management system that uses GPS to monitor the activity of tracked assets (vehicles, workers, equipment). It is often referred to as vehicle tracking or AVL. The fleet is generally a collection of land-based assets such as cars, trucks, field workers and equipment (powered and unpowered e.g. trailers).
