Fukuyama famously claims that human nature "is the sum of the behavior and characteristics that are typical of the human species, arising from genetic rather than environmental factors." Thus, humans are distinguished by an overall set of traits, rather than by any one trait; Fukuyama does not attempt a complete list.

Humans, Nature, and Ethics | Center for Humans & Nature

Human nature is a concept that denotes the fundamental dispositions and characteristics—including ways of thinking, feeling, and acting—that humans are said to have naturally. The term is often used to denote the essence of humankind, or what it 'means' to be human. This usage has proven to be controversial in that there is dispute as to whether or not such an essence actually exists.

Influential work by the great educator/philosopher maintains that the key to social psychology lies in an understanding of the many varieties of habit; individual mental activity is guided by subordinate factors of impulse and intelligence. His investigation focuses on three main areas of conduct: habit, impulse, and intelligence, with each factor receiving an incisive treatment.

Human Nature and Conduct - Dover Publications

This project encompasses Part 4 of 4 of his book Human Nature and Conduct, An Introduction to Social Psychology, published in 1922. Dewey's uses the words "HABIT" and "Impulse" as a specialized catch-all words to describe how a person and his/her objective environment interact. This interaction is the basis for moral and ethical judgments.
