Irrigation pumps are used to pump water from a lower to a higher level, from which it flows through pipes to the fields requiring irrigation (lift operation) or the pumps raise the pressure for spraying the fields (sprinkling). Usually the heads involved range from about 1 m for normal lift operation to 40 m for sprinkling.

Irrigation - KSB SE

Hydropower or water power (from Greek: ὕδωρ, "water") is power derived from the energy of falling or fast-running water, which may be harnessed for useful purposes. Since ancient times, hydropower from many kinds of watermills has been used as a renewable energy source for irrigation and the operation of various mechanical devices, such as gristmills, sawmills, textile mills, trip hammers ...
