Pedigree Worksheet With Answers | Teachers Pay Teachers

Answer Pedigree 1 • There are two affected siblings, a girl and a boy (black symbols) • The parents are relatives (consanguineous) as indicated by the double line drawn between the symbols of mother and father and the pedigree structure • The parents are not affected • This is horizontal transmission

Hanan Hamamy Department of Genetic Medicine and ...

The answer of course is III-3. III-1 and III-5 each have a $1/2$ chance of being a carrier but III-3 has almost a 0 chance of being a carrier. Why? Let's look at the Punnett Squares for X-linked recessive inheritance. In Pedigree above, II-2 and II-5 are both carriers, their father was affected and passed on his only X chromosome to his daughters.
